

## R400 Series Summing Indicator Manual Updated

The manual for the R400 Series Indicator version K481 for Summing Applications has been updated to the newest software version.

The firmware and manuals are available for download in the [K481 Summing Indicator Page](#) in the Rinstrum website.

## LX03-B02-0000 Load Cell Installation Manual Created

The LX03 strain sensor, a part of our custom range, allows for a hole to be drilled into a leg or existing structure and to measure the distortion of the hole by the applied load.

An installation manual has been created for the LX03-B02-0000 Load Cell, including specific instructions for installation and wiring.

## R320 Indicator Firmware Change Video Available

A 3-minute video clip has been created to show how the R320 indicator's firmware version can be changed using the R300 Viewer. In this video, an indicator with firmware version K354 gets updated to firmware version K356.

The video also shows how to retrieve the pre-purchased code from rinLIVE, our online activation site.

## R320 and X320 K300 software updated

The K300 firmware for the R320 and X320 indicators has been updated. The manual and firmware are available on the [R300 product pages](#) and [X300 product page](#).

The main updates include the following:

- Support added for printing with hi-res enabled in Industrial Mode
- Support added for 38,400-baud connections on the rear serial port
- Added several commands related to Simple Network

## Lua App created to generate emails from R400 Series Indicators

---

An app has been created to run on the Lua module (M4223) for the R400 Series of Indicators that allows emails to be generated when set events are triggered; E.g. when a target weight is reached or when users change Indicator settings.

The customisability of this app allows for the triggers to be set according to customer needs.

See the [R400 Lua Programmable Indicators](#) page on the Rinstrum Website for more information.
