

## New Viewers released for C500 Series

Updated versions of the C500 Series viewers have been released. This release includes the C510 viewer and the C520/C530 viewers in one installer package.

C510 Viewer

C520/C530 Viewer

Visit the [C500 Series Page](#) on the Rinstrum website for more information on the C500 Series and to download the viewer.

## New Range of Wireless Clickers Introduced

Rinstrum has introduced a range of low-cost wireless accessories that can be used to send signals to their indicators. These wireless devices work in two Radio Frequencies (315MHz and 433.92 MHz) to suit various regions.

Two variants are available, depending on mounting requirements:

- **Non-housing version**, suitable for direct mounting in X320s or ABS cabinets.
- **ABS housing**, with M12 version suitable for outdoor use

The transmitters are available in single-button and four-button versions, depending on the requirement.

The four-button clicker could be set up so that up to four functions – zero, tare, etc. – can be performed remotely using the clicker.

Visit the [Wireless Button Accessories Page](#) of the Rinstrum website for more information.

## Rinstrum Indicator Comparison Matrix Updated

---

The comparison chart that specifies and compares the functionality and basic differences of the entire spectrum of indicators offered by Rinstrum has been updated.

The newest version of this chart includes the following:

- C520 and C530 indicators
- Three new software variants – K346, K378, and K422
- EtherNet/IP

The matrix is downloadable on all indicator pages on the Rinstrum website and from the [direct link here](#).

## rinCATALOG Quarterly Update

---

The quarterly update of the rinCATALOG was done recently, with the highlight being the addition of the following two products:

- Wireless Clickers
- EtherNet/IP

Contact your sales team for a soft copy of the catalogue.
