New Training Videos Released for R400 Series

Three new training videos have been released in the new Training Videos page for the R400 Series, with two for K402 firmware and the other for K405 firmware.

In the first K402 Training Video, the K402 firmware is introduced including how to perform basic tasks using the firmware and its functionality.

In the second video, entitled K402 counting, describes how to create new products and how to set up piece counting in this firmware.

In the K405 Static Axle video, a brief demonstration is done on how to weigh a truck that stops on the load cell at each axle. The set up used is an R423 Indicator, a D841 Remote Display, the load cell, and a small tape printer.

For more videos released by Rinstrum, please see the Rinstrum Youtube Channel.

Calibration Sheet Created for R300 Series Indicators

A single-page calibration procedure sheet has been created for the R300 Series (K34* and K35* Firmware).

This sheet has been added to the newly created Calibration Sheets section of the General Reference page of the Rinstrum website, which also includes single-page calibration sheets for the C520, the R420, and the X320 indicators.

C500 Series Software Updated

The application software for the C500 Series of indicators has been updated and includes several new features and improvements.

The C500 Series Manual and Viewer software have also been updated in line with the software update.

The updated software, the manual, and the C500 Viewer software is available to download from the C520/C530 Industrial Weight Controllers page on the Rinstrum website.

C500 Series Indicator with Viewer

Poster Created for LED Remote Displays

A full-colour poster has been created for Rinstrum's range of LED Remote Displays in the D8xx and D7xx series. This poster is available to download from the following pages of the Rinstrum website:

- D732 Super Bright LED Remote Display
- D841 Super Bright LED Alpha Numeric Display
- D850 Large Remote Display
